

Cut your square out of this paper before folding. Keep instructions to refer to.

When folding, make sure the design stays on the outside. Fold under is the same as mountain fold in origami; It will look like an A. Fold over is the same as valley fold; it will look like a V. Fold 1 is from bottom left to top right.

When cutting out design, start with small details like eyes, nose and mouth, then move to larger sections last.

If you plan to display your creation on colored paper, I recommend leaving your snowflake under a heavy book for a few days first.
